Contents for Volume 147

Number 1, 7 November 1990

Škarka, V., Deneubourg, J. L. and Belić, M. R., Mathematical Model of Building Behavior of *Apis mellifera* 1

Amir, S. and Cohen, D., Optimal Reproductive Efforts and the Timing of Reproduction of Annual Plants in Randomly Varying Environments 17

Ho, M.-W., An Exercise in Rational Taxonomy 43

Sumida, B. H., Houston, A. I., McNamara, J. M. and Hamilton, W. D., Genetic Algorithms and Evolution 59

Kaden, F., Koch, I. and Selbig, J., Knowledge-based Prediction of Protein Structures 85

García-Dorado, A., Some Evolutionary Properties of Parental Investment per Offspring in a Heterogeneous Environment 101

Wells, H., Wells, P. H. and Cook, P., The Importance of Overwinter Aggregation for Reproductive Success of Monarch Butterflies (*Danaus plexippus* L.) 115

Lundberg, S., Evolution of Increased Susceptibility to Infectious Diseases in Age Structured Populations 133

Errata 143

Number 2, 21 November 1990

Mini Review
Stein, W. D., Energetics and the Design Principles of the Na/K-ATPase 145

Alonso, G. L. and Hecht, J. P., Thermodynamics of Ca^{2+} Transport through Sarcoplasmic Reticulum Membrane during the Transient-state of Simulated Reactions 161

McLean, A. R. and Kirkwood, T. B. L., A Model of Human Immunodeficiency Virus Infection in T Helper Cell Clones . . 177

León, A., Coevolution: New Thermodynamic Theorems 205

Drake, J. A., The Mechanics of Community Assembly and Succession . 213

Hariri, A., Weber, B. and Olmsted, III, J., On the Validity of Shannon-information Calculations for Molecular Biological Sequences . . 235

GEEVAN, C. P., SUBBA RAO, J., SUBBA RAO, G. and BAJAJ, J. S., A Mathematical Model for Insulin Kinetics III. Sensitivity Analysis of the Model . 255

BUTLER, J. P., Fraction of Trees with given Root Traits; the Limit of Large Trees 265

WEERAPPULI, D. P. V., PITTMAN, R. N. and POPEL, A. S., Effect of Convection in Capillaries on Oxygen Removal from Arterioles in Striated Muscle 275

Number 3, 7 December 1990

RYTI, R., Theoretical Considerations of Density-dependent Spacing of a Mound-building Ant (*Formica altipetens*) 289

RYAN, G. W., ROUSE, J. L. and BURSILL, L. A., Quantitative Analysis of Sunflower Seed Packing 303

MATSUDA, H. and HARADA, Y., Evolutionarily Stable Stalk to Spore Ratio in Cellular Slime Molds and the Law of Equalization in Net Incomes 329

FORBES, L. S., Insurance Offspring and the Evolution of Avian Clutch Size 345

LEONARD, J. L., The Hermaphrodite's Dilemma 361

MARIN, J. L., MUÑIZ, J. and HUERTA, M., Further Analysis of the Molecular Jet Hypothesis During Muscle Contraction 373

VINET, A. and ROBERGE, F. A., A Model Study of Stability and Oscillations in the Myocardial Cell Membrane 377

FRANCE, J., THEODOROU, M. K. and DAVIES, D., Use of Zoospore Concentrations and Life Cycle Parameters in Determining the Population of Anaerobic Fungi in the Rumen Ecosystem 413

COSMI, C., CUOMO, V., RAGOSTA, M. and MACCHIATO, M. F., Characterization of Nucleotide Sequences using Maximum Entropy Techniques . . 423

Number 4, 21 December 1990

GOODALL, C., KIM, S. H., MOSS-SALENTIJN, L. and SHINOZUKA, M., Numerical Simulation of the Crown of an Incisiform Tooth by Conformal and Polynomial Regression Mapping of a Simple Model 433

INGHE, O., Computer Simulations of Flowering Rhythms in Perennials—Is there a New Area to Explore in the Quest for Chaos? . . . 449

JOHNSTON, T. D. and GOTTLIEB, G., Neophenogenesis: A Developmental Theory of Phenotypic Evolution 471

WANG, Z.-X., Kinetics of Suicide Substrates 497

CHANG, Y.-I. and HSU, J.-P., The Effect of Multivalent Cations on Adhesion Time for Cellular Adhesion to Solid Surfaces 509

ORENGO, C. A. and TAYLOR, W. R., A Rapid Method of Protein Structure Alignment 517

CAMAZINE, S., SNEYD, J., JENKINS, M. J. and MURRAY, J. D., A Mathematical Model of Self-organized Pattern Formation on the Combs of Honeybee Colonies 553

Index to Volume 147

Adhesion, cellular, to solid surfaces, effect of multivalent cations on adhesion time for, 509
Age structured populations, evolution of increased susceptibility to infectious diseases in, 133
Aggregation, overwinter: importance for reproductive success of monarch butterflies (*Danaus plexippus* L.), 115
Algorithms, genetic, and evolution, 59
ALONSO, G. L. and HECHT, J. P., Thermodynamics of Ca^{2+} transport through sarcoplasmic reticulum membrane during the transient-state of simulated reactions, 161
AMIR, S. and COHEN, D., Optimal reproductive efforts and the timing of reproduction of annual plants in randomly varying environments, 17
Annual plants in randomly varying environments, optimal reproductive efforts and the timing of reproduction of, 17
Ant, mound-building, (*Formica altipetens*), theoretical considerations of density-dependent spacing of, 289
Apis mellifera, mathematical model of building behavior of, 1
Arterioles, effect of convection in capillaries on oxygen removal from, in striated muscle, 275
Assembly, community, mechanics of, 213
Avian clutch size, insurance offspring and the evolution of, 345

BAJAJ, J. S. (see GEEVAN, C. P.), 255
Behavior, building, of *Apis mellifera*, mathematical model of, 1
BELIĆ, M. T. (see ŠKARKA, V.), 1
Building behavior of *Apis mellifera*, mathematical model of, 1
BURSILL, L. A. (see RYAN, G. W.), 303
BUTLER, J. P., Fraction of trees with given root traits; the limit of large trees, 265
Butterflies, monarch, (*Danaus plexippus* L.), the importance of overwinter aggregation for reproductive success of, 115

Ca^{2+} transport through sarcoplasmic reticulum membrane during the transient-state of simulated reactions, thermodynamics of, 161
CAMAZINE, S., SNEYD, J., JENKINS, M. J. and MURRAY, J. D., A mathematical model of self-organized pattern information on the combs of honeybee colonies, 553
Capillaries, convection in; effect on oxygen removal from arterioles in striated muscle, 275
Cations, multivalent; effect on adhesion time for cellular adhesion to solid surfaces, 509
Cell membrane, myocardial, a model study of stability and oscillations in, 377
Cellular adhesion to solid surfaces, effect of multivalent cations on adhesion time for, 509
Cellular slime molds, evolutionarily stable stalk to spore ratio in, and the law of equalization in net incomes, 329
CHANG, Y.-I. and HSU, J.-P., The effect of multivalent cations on adhesion time for cellular adhesion to solid surfaces, 509
Chaos: computer simulations of flowering rhythms in perennials, 449
Clutch size, avian, evolution of, and insurance offspring, 345
Coevolution: new thermodynamic theorems, 205
COHEN, D. (see AMIR, S.), 17
Combs of honeybee colonies, a mathematical model of self-organized pattern formation on, 553
Community assembly and succession, mechanics of, 213
Convection in capillaries: effect on oxygen removal from arterioles in striated muscle, 275
COOK, P. (see WELLS, H.), 115

COSMI, C., CUOMO, V., RAGOSTA, M. and MACCHIATO, M. F., Characterization of nucleotide sequences using maximum entropy techniques, 423
CUOMO, V. (see COSMI, C.), 423

Danaus plexippus L., the importance of overwinter aggregation for reproductive success of, 115
DAVIES, D. (see FRANCE, J.), 413
DENEUBOURG, J. L. (see ŠKARKA, V.), 1
Density-dependent spacing of a mound-building ant (*Formica altipetens*), theoretical considerations of, 289
DRAKE, J. A., The mechanism of community assembly and succession, 213

Ecosystem, rumen, use of zoospore concentrations and life cycle parameters in determining the population of anaerobic fungi in, 413
Energetics and the design principles of the Na/K-ATPase, 145
Equalization in net incomes, law of, and evolutionarily stable stalk to spore ratio in cellular slime molds, 329
Evolution of avian clutch size, and insurance offspring, 345
Evolution and genetic algorithms, 59
Evolution of increased susceptibility to infectious diseases in age structured populations, 133
Evolution, phenotypic, a developmental theory; neophenogensis, 471
Evolutionarily stable stalk to spore ratio in cellular slime molds and the law of equalization in net incomes, 329
Evolutionary properties of parental investment per offspring in a heterogeneous environment, 101

Flowering rhythms in perennials, computer simulations of, 449
FORBES, L. S., Insurance offspring and the evolution of avian clutch size, 345
Formica altipetens (mound-building ant), theoretical considerations of density-dependent spacing of, 289
FRANCE, J., THEODOROU, M. K. and DAVIES, D., Use of zoospore concentrations and life cycle parameters in determining the population of anaerobic fungi in the rumen ecosystem, 413
Fungi, anaerobic, in the rumen ecosystem, use of zoospore concentrations and life cycle parameters in determining the population of, 413

GARCÍA-DORADO, A., Some evolutionary properties of parental investment per offspring in a heterogeneous environment, 101
GEEVAN, C. P., SUBBA RAO, J., SUBBA RAO, G. and BAJAJ, J. S., A mathematical model for insulin kinetics. III. Sensitivity analysis of the model, 255
Genetic algorithms and evolution, 59
GOODALL, C., KIM, S. H., MOSS-SALENTIJN, L. and SHINOZUKA, M., Numerical simulation of the crown of an incisiform tooth by conformal and polynomial regression mapping of a simple model, 433
GOTTLIEB, G. (see JOHNSTON, T. D.), 471

HAMILTON, W. D. (see SUMIDA, B. H.), 59
HARADA, Y. (see MATSUDA, H.), 329
HARIRI, A., WEBER, B. and OLMSTED, III, J., On the validity of Shannon-information calculations for molecular biological sequences, 235
HECHT, J. P. (see ALONSO, G. L.), 161
Hermaphrodite's dilemma, 361
HO, M.-W., An exercise in rational taxonomy, 43
Honeybee colonies, a mathematical model of self-organized pattern formation on the combs of, 551

HOUSTON, A. I. (see SUMIDA, B. H.), 59
HSU, J.-P. (see CHANG, Y.-I.), 509
HUERTA, M. (see MARIN, J. L.), 373
Human immunodeficiency virus infection in T helper cell clones, a model of, 177

Infectious diseases, evolution of increased susceptibility to, in age structured populations, 133
INGHE, O., Computer simulations of flowering rhythms in perennials—is there a new area to explore in the quest for chaos?, 449
Insulin kinetics, a mathematical model; sensitivity analysis, 255
Insurance offspring and the evolution of avian clutch size, 345
Investment, parental, per offspring, in a heterogeneous environment, some evolutionary properties of, 101

JENKINS, M. J. (see CAMAZINE, S.), 553
JOHNSTON, T. D. and GOTTLIEB, G., Neophenogensis: a developmental theory of phenotypic evolution, 471

KADEN, F., KOCH, I. and SELBIG, J., Knowledge-based prediction of protein structures, 85
KIM, S. H. (see GOODALL, C.), 433
Kinetics, insulin, a mathematical model; sensitivity analysis, 255
Kinetics of suicide substrates, 497
KIRKWOOD, T. B. L. (see MCLEAN, A. R.), 177
Knowledge-based prediction of protein structures, 85
KOCH, I. (see KADEN, F.), 85

LEÓN, A., Coevolution: new thermodynamic theorems, 205
LEONARD, J. L., The hermaphrodite's dilemma, 361
LUNDBERG, S., Evolution of increased susceptibility to infectious diseases in age structured populations, 133
MACCHIATO, M. F. (see COSMI, C.), 423
MCLEAN, A. R. and KIRKWOOD, T. B. L., A model of human immunodeficiency virus infection in T helper cell clones, 177
MCNAMARA, J. M. (see SUMIDA, B. H.), 59
MARIN, J. L., MUÑIZ, J. and HUERTA, M., Further analysis of the molecular jet hypothesis during muscle contraction, 373
MATSUDA, H. and HARADA, Y., Evolutionarily stable stalk to spore ratio in cellular slime molds and the law of equalization in net incomes, 329
Maximum entropy techniques: use in characterization of nucleotide sequences, 423
Membrane, cell, myocardial, a model study of stability and oscillations in, 377
Membrane, sarcoplasmic reticulum, thermodynamics of Ca^{2+} transport through, during the transient-state of simulated reactions, 161
Molecular biological sequences, the validity of Shannon-information calculations for, 235
Molecular jet hypothesis during muscle contraction, further analysis of, 373
MOSS-SALENTIJN, L. (see GOODALL, C.), 433
MUÑIZ, J. (see MARIN, J. L.), 373
MURRAY, J. D. (see CAMAZINE, S.), 553
Muscle contraction, further analysis of the molecular jet hypothesis during, 373
Muscle, striated, effect of convection in capillaries on oxygen removal from arterioles in, 275
Myocardial cell membranes, a model study of stability and oscillations in, 377
Na/K-ATPase, energetics and the design principles of, 145

Neophenogensis: a developmental theory of phenotypic evolution, 471
Nucleotide sequences: characterization using maximum entropy techniques, 423

Offspring, insurance, and the evolution of avian clutch size, 345
Offspring, some evolutionary properties of parental investment per, in a heterogeneous environment, 101
OLMSTED, III, J. (see HARIRI, A.), 235
ORENGO, C. A. and TAYLOR, W. R., A rapid method of protein structure alignment, 517
Oscillations in the myocardial cell membrane, a model study of stability and, 377
Overwinter aggregation: importance for reproductive success of monarch butterflies (*Danaus plexippus* L.), 115
Oxygen removal from arterioles in striated muscle, effect of convection in capillaries on, 275

Packing, sunflower seed; quantitative analysis, 303
Parental investment per offspring in a heterogeneous environment, some evolutionary properties of, 101
Pattern formation on the combs of honeybee colonies, a mathematical model of, 553
Perennials, computer simulations of flowering rhythms in, 449
Phenotypic evolution, a developmental theory; neophenogensis, 471
PITTMAN, R. N. (see WEERAPPULI, D. P. V.), 275
Plants, annual, in randomly varying environments, optimal reproductive efforts and the timing of reproduction of, 17
POPEL, A. S. (see WEERAPPULI, D. P. V.), 275
Populations, age structured, evolution of increased susceptibility to infectious diseases in, 133
Prediction, knowledge-based, of protein structures, 85
Protein structure alignment, a rapid method of, 517
Protein structures, knowledge-based prediction of, 85

RAGOSTA, M. (see COSMI, C.), 423
Reproductive efforts, optimal, and the timing of reproduction of annual plants in randomly varying environments, 17
Reproductive success of monarch butterflies (*Danaus plexippus* L.), the importance of overwinter aggregation for, 115
Rhythms, flowering, in perennials, computer simulations of, 449
ROBERGE, F. A. (see VINET, A.), 377
Roots of trees; the limit of large trees, 265
ROUSE, J. L. (see RYAN, G. W.), 303
Rumen ecosystem, use of zoospore concentrations and life cycle parameters in determining the population of anaerobic fungi in, 413
RYAN, G. W., ROUSE, J. L. and BURSILL, L. A., Quantitative analysis of subflower seed packing, 303
RYTI, R., Theoretical considerations of density-dependent spacing of a mound-building ant (*Formica altipetens*), 289

Sarcoplasmic reticulum membrane, thermodynamics of Ca^{2+} transport through, during the transient-state of simulated reactions, 161
Seed packing, sunflower; quantitative analysis, 303
SELBIG, J. (see KADEN, F.), 85
Sequences, molecular biological, the validity of Shannon-information calculations for, 235
Sequences, nucleotide; characterization using maximum entropy techniques, 423
Shannon-information calculations for molecular biological sequences, validity of, 235
SHINOZUKA, M. (see GOODALL, C.), 433
ŠKARKA, V., DENEUBOURG, J. L. and BELIĆ, M. T., Mathematical model of building behavior of *Apis mellifera*, 1
SNEYD, J. (see CAMAZINE, S.), 553
Stability and oscillations in the myocardial cell membrane, a model study of, 377

Stalk to spore ratio, evolutionarily stable, in cellular slime molds, and the law of equalization in net incomes, 329
STEIN, W. D., Energetics and the design principles of the Na/K-ATPase, 145
Structure alignment, protein, a rapid method of, 517
Structures, protein, knowledge-based prediction of, 85
SUBBA RAO, G. (see GEEVAN, C. P.), 255
SUBBA RAO, J. (see GEEVAN, C. P.), 255
Substrates, suicide, kinetics of, 497
Suicide substrates, kinetics of, 497
SUMIDA, B. H., HOUSTON, A. I., MCNAMARA, J. M. and HAMILTON, W. D., Genetic algorithms and evolution, 59
Sunflower seed packing; quantitative analysis, 303

T helper cell clones, a model of human immunodeficiency virus infection in, 177
Taxonomy, rational, an exercise in, 43
TAYLOR, W. R. (see ORENGO, C. A.), 517
THEODOROU, M. K. (see FRANCE, J.), 413
Thermodynamic theorems, new, and coevolution, 205
Thermodynamics of Ca^{2+} transport through sarcoplasmic reticulum membrane during the transient-state of simulated reactions, 161
Tooth, incisiform, numerical simulation of the crown of, by conformal and polynomial regression mapping of a simple model, 433
Transient-state of simulated reactions, thermodynamics of Ca^{2+} transport through sarcoplasmic reticulum membrane during, 161
Transport, Ca^{2+}, through sarcoplasmic reticulum membrane during the transient-state of simulated reactions, thermodynamics of, 161
Trees: fraction with given root traits; the limit of large trees, 265

VINET, A. and ROBERGE, F. A., A model study of stability and oscillations in the myocardial cell membrane, 377
